EXAMINER'S AMENDMENT

1. The following is an examiner's statement of reasons for allowance: The examiner was able to find a system in accordance with applicants admitted prior art the examiner however was unable to find the claimed transmitting a write operation cycle to both the north bridge control chip and the south bridge control chip when the microprocessor is performing the write operation cycle related to the configuration spaces, wherein: the first actual configuration space is written to only when the write operation cycle is addressed to the first actual configuration space; and the second actual configuration space is written to only when the write operation cycle is addressed to the second configuration storage space; when the microprocessor is performing a read operation cycle related to the configuration spaces, selecting data read from the first actual configuration space only when the read operation cycle is addressed at the first actual configuration space; and selecting data read from the second actual configuration space only when the read operation cycle is addressed at the second actual configuration storage space. Hewitt et al teaches passing for both a read and write an access to the north bridge and then if the address is not in the north bridge passing the access to the south bridge.

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Figure 1 will be labeled "prior art". In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
